SUMMARY

Fullstack Developer with over 2 years of experience in mobile development, backend engineering, and web development. My journey includes building robust mobile applications with Flutter and Native Android Development, developing efficient backends using Django, and designing intuitive web interfaces with React.js and Nextjs.

SKILL

- | | | |
|-----------------------------|--------------------------|----------------------|
| • Data analysis with Python | • React / Next.js | • PostgreSQL/Mongodb |
| • JavaScript / TypeScript | • HTML, CSS, Tailwind | • Java |
| • SQL, FastApi, Django | • Mobile App Development | • NextJs |

WORK EXPERIENCE

Ministry of Innovation and Technology

October 2023 - January 2024

Fullstack Developer

- Built and maintained scalable web applications with a strong focus on performance and reliability
- Wrote efficient backend logic and APIs while ensuring clean documentation
- Analyzed system data to improve application stability and user experience
- Worked cross-functionally to translate business requirements into technical solutions

Draftbit (Remote | US-based clients)

July 2024- September 2025

Mobile Developer

- Built and customized mobile applications using React Native within the Draftbit low-code platform, focusing on smooth touch interactions and responsive layouts.
- Translated product ideas and UI concepts into functional mobile screens with a strong emphasis on usability, accessibility, and performance.
- Worked with component-based architectures, state management, and navigation patterns common in production React Native apps.

Digital Oil Trade PLC(Remote)

April 2025 - Present

Fullstack Developer

- Built and scaled backend services using Python, FastAPI, and Django, delivering high-performance APIs used in production systems.
- Designed and implemented AI/LLM-powered features using models like GPT-style LLMs, focusing on real-world use cases such as automation, data extraction, and intelligent assistants.
- Developed end-to-end ML workflows including data preprocessing, model integration, evaluation, and optimization.

EDUCATION

Bachelor of Science in Electrical and computer Engineering

October 2019 - July 2024

Addis Ababa University institute of Tecnology

- Completed coursework in Electrical and Computer Engineering, Computer stream focusing on Data Structures and Algorithms.
